

# Aphilles

## Pros:

- ☯ Food for everybody / no world hunger
- ☯ Fast growing, grows to maturity and fruits within a month
- ☯ All parts of the organism can be utilised for consumption and/or fuel, medicine and crap
- ☯ Leaves – fiber and flavour (makes a mean pesto).
- ☯ Sap – cheap clean fuel (for cars and rockets)
- ☯ Stalk pulp – Paper, fibers for clothing, rope, rope-clothing
- ☯ Fruit –eating for vitamins (All, including niacin and riboflavin, iron[not technically a vitamin, but a mineral of great stature]), bacterium & virus antibodies, juice (tastes good!, alphajuce in the morning is good for you!).
- ☯ Roots – Starchy goodness, like potatoes, bake, roast, steam, the list, it is endless!
- ☯ Can grow in all seasons and climates effectively, hardy and enduring.
- ☯ Pest and disease resistant.
- ☯ Flouride in the plant for healthy teeth.
- ☯ Spliced with mint, for fresh breath.
- ☯ Farmers who grow Aphillies are subsidised by the govt.

## Cons:

- ☯
